MAP Urges Completion of Critical Skyway Segment

April 22, 2025

As part of our commitment to help shape a stronger nation, the Management Association of the Philippines (MAP) fully supports the government's infrastructure development program to address the country's infrastructure inadequacies. We firmly believe that vital transport infrastructure projects geared towards national development will open opportunities for more investments which will help spur economic growth.

One significant project currently under construction is the link connecting the NLEX-SLEX Connector Road Project and the Metro Manila Skyway Stage 3. This essential infrastructure will enhance connectivity between the northern and the southern provinces, significantly reducing travel time for people, goods, and services, thereby promoting economic growth.

It will facilitate seamless access between the NAIA and the Clark airports, as well as the ports of Bataan, Manila, and Batangas, improving operations for various businesses and boosting tourism potential. The logistics sector will also benefit from this project, as cargo trucks will have 24/7 access to the road without concerns about truck bans.

Additionally, this alternative route will help alleviate congestion on major thoroughfares in Metro Manila, including España Boulevard, Quezon Avenue, Lacson Avenue, Magsaysay Boulevard, and Quirino Avenue.

We strongly urge the government, and the parties involved to fast-track the completion of this project and other vital infrastructure developments for nation-building.

ALFREDO S. PANLILIO
MAP President

EDUARDO H. YAP
Chair, MAP Transportation and
Infrastructure Committee
